Summary

Information Technology graduate with professional experience in backend and full-stack development. Experienced in designing RESTful APIs using Node.js and FastAPI, developing PostgreSQL database solutions, deploying applications on Google Cloud Platform, and collaborating in Agile teams. Passionate about building scalable web applications and continuously learning modern software technologies.

Technical Skills

Development Tools: Visual Studio Code

Programming Languages: Python, SQL, JavaScript, HTML, CSS, XML

Frameworks & Technologies: Flutter, FastAPI, Odoo, React, Node.js, WordPress

Cloud & Server Technologies: Google Cloud Platform (GCP), Google Cloud Storage, Redis

API Development: REST APIs, OpenAPI (Swagger), JSON

Databases: PostgreSQL, Firebase

Version Control: Git, GitHub

CI/CD: GitHub Actions

Testing, Security & Monitoring: Jest, Apache JMeter, k6, Scrutinizer, sqlmap, OpenSSL, UptimeRobot, Postman

Virtualization: Oracle VirtualBox

Professional Experience

Call & Email Management System

July 2026 – Sep 2026

Position: Rooche Digital IT Solutions – Frontend Developer (Remote)

Tools/Tech: React, TypeScript, JavaScript, HTML, CSS, GitHub

- Contributed to the migration of an existing sales outreach and communication management system to a new platform supporting cold calls, email outreach, lead management, and contact tracking.
- Developed and integrated new frontend features using React and TypeScript to create reusable components and integrating RESTful APIs for leads, contacts, calls, emails, and communication workflows.
- Debugged and resolved frontend bugs, UI issues, and API integration problems while refactoring components to improve code quality, maintainability, and performance.
- Collaborated with backend developers and stakeholders to implement requirements, validate migrated features, and ensure a smooth and consistent user experience across the new platform.

Location-Based Augmented Reality (AR) Token Collection Game

Jan 2026 – July 2026

Position: Rooche Digital IT Solutions – Backend Developer (Remote)

Tools/Tech: Node.js, JavaScript, PostgreSQL, GCP, Redis, REST APIs, OpenAPI (Swagger), GitHub, Postman

- Designed, developed, and maintained 30+ RESTful API endpoints supporting core gameplay mechanics, user management, authentication, and in-game transactions.
- Developed backend services interacting with a PostgreSQL database containing 36 relational tables, ensuring efficient data storage and retrieval.
- Deployed and configured backend infrastructure on Google Cloud Platform (GCP), including Virtual Machines (VMs) for application hosting and PostgreSQL database services.
- Integrated Redis to improve application performance through high-speed data caching.
- Performed API testing and validation using Postman to ensure functionality, reliability, and accurate request/response handling.
- Documented REST APIs using OpenAPI (Swagger), providing interactive API documentation for frontend developers and QA engineers.
- Collaborated closely with the frontend developer to define API requirements, data structures, and endpoint

specifications, ensuring seamless client-server integration.

- Prepared backend infrastructure and API services to support the project's planned launch capacity of 500–1,000 concurrent users.

Automobile Product Website, Internal Admin & Product System

Sep 2025 – Jan 2026

Position: Rooche Digital IT Solutions – Full Stack Developer (Remote)

Tools/Tech: Ruby, React, WordPress, Visual Studio Code, HTML, CSS

- Developed a multi-page automobile product website using WordPress according to client specifications.
- Key pages included Home, Products, About Us, Contact Us, and Location.
- Customized themes and plugins to ensure a clean layout, intuitive navigation, and easy content management.
- Maintained and enhanced internal and product systems.
- Added 4+ new features and improved existing functionalities using React on the frontend and Ruby on the backend.
- Collaborated with the team to troubleshoot issues and improve overall system performance.

School Management System

Jan 2025 – May 2025

Position: Cerebro - IT Intern (Hybrid)

Tools/Tech: FastAPI, Flutter, Odoo, Firebase, PostgreSQL, Python, Android Studio, pgAdmin 4, Visual Studio Code, XML, CSS, SQL

- Built 7+ FastAPI endpoints for mobile apps, serving 500+ users across multiple schools.
- Improved UI/UX in 5+ Flutter modules: dynamic profiles, editable grades, attendance summaries.
- Integrated push notifications using Firebase Cloud Messaging (FCM) across mobile and WebView apps.
- Developed a real-time notification system with animations, sounds, and unread indicators.
- Created a Task Manager in Odoo with CRUD operations and 4+ user views (Kanban, Calendar, etc.).

Academic Projects

Website for Petition Class Information System

Jun 2024 – Dec 2024

Position: Quality Assurance

Tools/Tech: Manual Testing, Test Cases, sqlmap, OpenSSL, Apache Jmeter, Uptime Robot, Scrutinizer

- Executed 100+ manual test cases across 6 user roles.
- Ran SQL injection tests (sqlmap) and validated HTTPS encryption via OpenSSL.
- Simulated 300 users using JMeter; resolved performance bottlenecks.
- Achieved 84.34 SUS usability score after 19-user UAT sessions.

Content Management System and Feedback Acquisition

Aug 2023 – Apr 2024

Position: Quality Assurance

Tools/Tech: Manual Testing, Test Cases, Unit Testing, Integration Testing

- Executed 50+ test cases to validate features like user registration, content management, and feedback submission.
- Performed unit testing on 30+ modules to ensure accurate and isolated component behavior.
- Conducted integration testing across 10+ module interactions to confirm data flow and system reliability.
- Reported 15+ critical bugs; worked with developers to resolve issues, reducing post-launch defects.

Education

University of Santo Tomas

España Boulevard, Sampaloc, Manila

Bachelor of Science in Information Technology

Graduation Date: June 28, 2025

Honors: Cum Laude, Dean's List (2021–2025)

Certificates

- **Python for Everybody Specialization**
Offered by the University of Michigan (via Coursera)

August 2025

- **Meta Front-End Developer Professional Certificate**
Offered by Meta (via Coursera)

August 2025

- **Responsive Web Design Certificate**
Offered by freeCodeCamp

September 2025
